

1010 White Street SW, Atlanta, GA 303010

TECHNICAL SPECIFICATIONS

Total Capacity: Standing room only 750 +; Seated 225, Mixed standing & seated 500.

We are located inside of **Wild Heaven Beer – Brewery & Gardens - West End** and as part of the LEE + WHITE Entertainment District

The official name of the venue is “**The Garden Club at Wild Heaven West End**” or “**The Garden Club**” for short.

Approach & Load-In:

Approach from White Street to the loading ramp - vehicle can be pulled directly into the venue with a 13' X 11" width and 11' 8" foot clearance. The ample parking area is under 24 hour security watch and cameras. Artist parking spots are located near the left side of the loading ramp and alongside the building (pictured below). Stairs to the stage are located on the loading ramp (southwest) and (southeast) side of the stage.

Merch area is just on the other side of the loading ramp inside house left / stage right, this makes for a short push.

Stage & Power:

Stage Dimensions: 14' D x 21' 4" W x 30" H

Access: 3 steps to stage are located upstage on the stage's southwest side, nearest the loading ramp and 3 mirrored steps opposite side into monitor mix position / backstage.

AC Power: Multiple distinct 20A circuits available and accessible across the stage

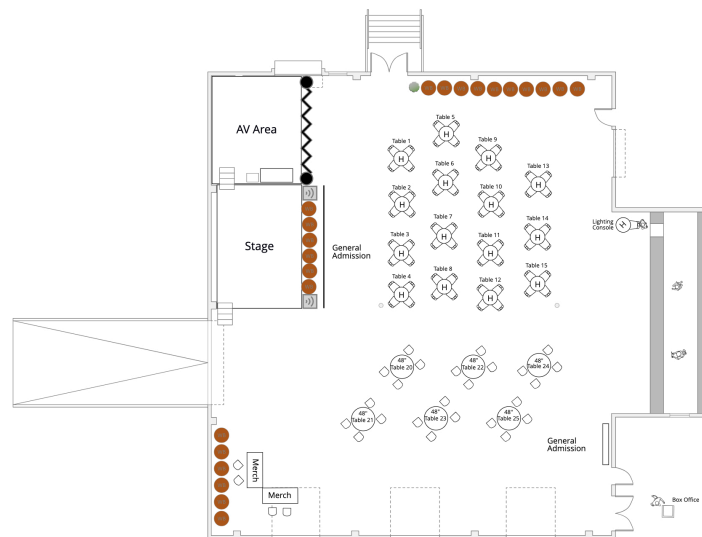

- This circuit is completely free of use by any other system power, lighting, etc.
- Various "guest receptacles" available high and low for supplemental lighting, etc.
- 14x) 20A circuits around the perimeter of the space for general use

Monitoring: 6 loudspeaker monitor mixes are available to the artist

- Additional I/O for IEMs, etc. are available as well.

Input Channels: 24+ input channels are available to the artist via multiple XLR drop snakes or stage boxes

Backline: No house backline exists, rentals may be negotiated on a per-show basis

SOUND SYSTEM

FOH / PA System Specifications:

FOH Console: MIDAS M32 Live (2019 version) w/ w/2.4+5G router & iPad control

- Console is located at “Monitor Engineer” position, walkabout FOH mixing via iPad.
- Console can be moved to a FOH position, along with lighting console. CAT5 cables extend the reach to two (2) Midas 16 input / 8 output stage boxes on either side of the stage.

Loudspeakers & Amplification:

Mains: 6-per-side RCF HDL6 Active Line Array

Subs: 2x) 18" cabinets | 2x) Custom Design SD21" cabinets - all BNC Drivers

-- Full-Range System - Processed via ASHLY Protea 4.8SP Digital X-Over

** Overall, the system is capable of ~150dB SPL, full-range, at field center.

Monitors: 6+ Mixes - mixed EV and JBL Active Monitors

DSC Mix: 2x) Passive Yamaha CHR12M - Yorkville PX1700 Power Amp

Additional I/O for IEMs, etc. is available

- VTC DLMS4080 Digital Crossover
- Yorkville AP4K Power Amps (4-Way System)
- 6x M10a Monitors / Yorkville PX1700 Amps
- 2 Yamaha 1000W CHR12M 12" inch Passive Speakers
- 10 (5 per side) RCF HDL6 Line Array speakers

Overall, the system provides around 25,000 Watts of headroom and the capability of about 5,600 Watts of continuous power dissipation. Reasonably, the system is limited to around 12,000 Watts of musical reproductive power.

Microphones, DIs & Support: Shure, Audix, etc. all professional level mics, Active and Passive DIs available, ample cabling and support is available. ALL Mics, Cables, DIs, and mic support are provided by the venue.
